

The background is a soft pink color. On the left side, there are several white cherry blossoms with yellow centers. In the center-left, there is a small, round, woven basket containing three eggs: one light blue with white floral patterns and two pink with white dots. At the bottom left, there are more light blue and pink eggs scattered on the surface.

MECH | FDP ON APPLICATIONS OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING IN MECHANICAL ENGINEERING

Artificial Intelligence techniques

Machine Learning

Input → Feature extraction → Classification → Output

Traditional machine learning uses hand-crafted features, which is tedious and costly to develop.

Deep Learning

Input → Neural Networks → Output

Deep learning learns hierarchical representation from the data itself, and scales with more data.

Machine Learning Applications in Mechanical Engineering..

Input image data of part → Train a CNN model → Recommendation algorithm → List of recommended parts that match the input geometry the most

- If an image can be used to get the required part from the standard library, all we will need to do is to make a rough CAD model of it and send it through our algorithm.
- The algorithm will decide which parts are best and help narrow down our search significantly.
