**Important Issues Course**

Course should be instructor-led & student-centered  
 Learning should be collaborative in nature  
 Coursework should maximize participation flexibility and providing a framework for student pacing  
 Courses should foster information, communication, collaboration and team-building skills  
 Course format, expectations and instructions should be clear and concise.  
 Activities and assessments should account for different learning Styles

## Design Thinking Defined

- Design thinking is evangelized by IDEO.
- IDEO is founded by Mr. **David M. Kelley**.

A systematic approach to solve design problems by understanding users' needs and developing insights to solve those needs.

- User problems, pains and issues is central to design thinking not technology. Technology is enabler to solve user problems.
- Encourage you to implement Design thinking principles for your project development

# International Museum Day

Every year on 18 May **International Museum Day** is observed to raise awareness among people about the museums as an important means of cultural exchange and development of mutual understanding, cooperation and peace among people.

Since its inception, UNESCO has recognized museums as one of its most important partners for building peace in the minds of women and men. Today museums specialize in everything from human ingenuity and cultural expressions to natural heritage. They may be indoors, open-air, underwater and virtual, attracting and inspiring millions of visitors each day. As museum attendance continues to grow around the world, UNESCO is working to link their work with sustainable development and peace building.
