The screenshot shows a Google Meet window with a presentation slide titled "Problem Statement - Active Learning for Vehicle Detection". The slide content is as follows:

Problem Statement - Active Learning for Vehicle Detection

You will be provided a couple of downloadable videos of traffic from a 4 way junction taken in a small Indian town. Using Active Learning ML Techniques, your task is to find out in real time the different types of 3/4/6 wheel vehicles that are moving in each direction. Your solution should process the video using Active Learning ML techniques and output the following

1. a video with bounding boxes drawn around each class of detected vehicles
2. a summary of the count and type of vehicles that have moved in each of the four directions.

Sample Output - <https://www.youtube.com/watch?v=G46kNIFg2IU>

North - 1 Bajaj, 1 Jeeto; **South** - 2 Cars; **East** - 2 Buses; **West** - 3 Lorries

NOTE: Autos and Light Commercial Vehicles need exact class detection

The Meet interface shows a recording icon (REC), the presenter's name "nanu swamy is presenting", and a grid of participants including Shankar Mahadev..., Ajai Pranav G L 21..., Harshmoan Kulk..., Reshma Nawaz, and 97 others.

What Is The Native App Development?

The app developed exclusively for a single platform using a native-to-the-operating-system language is a Native App. For instance, to develop a Native app for the Android platform, Java or Kotlin, likewise, for the iOS Native App, Objective-C or Swift can be used.

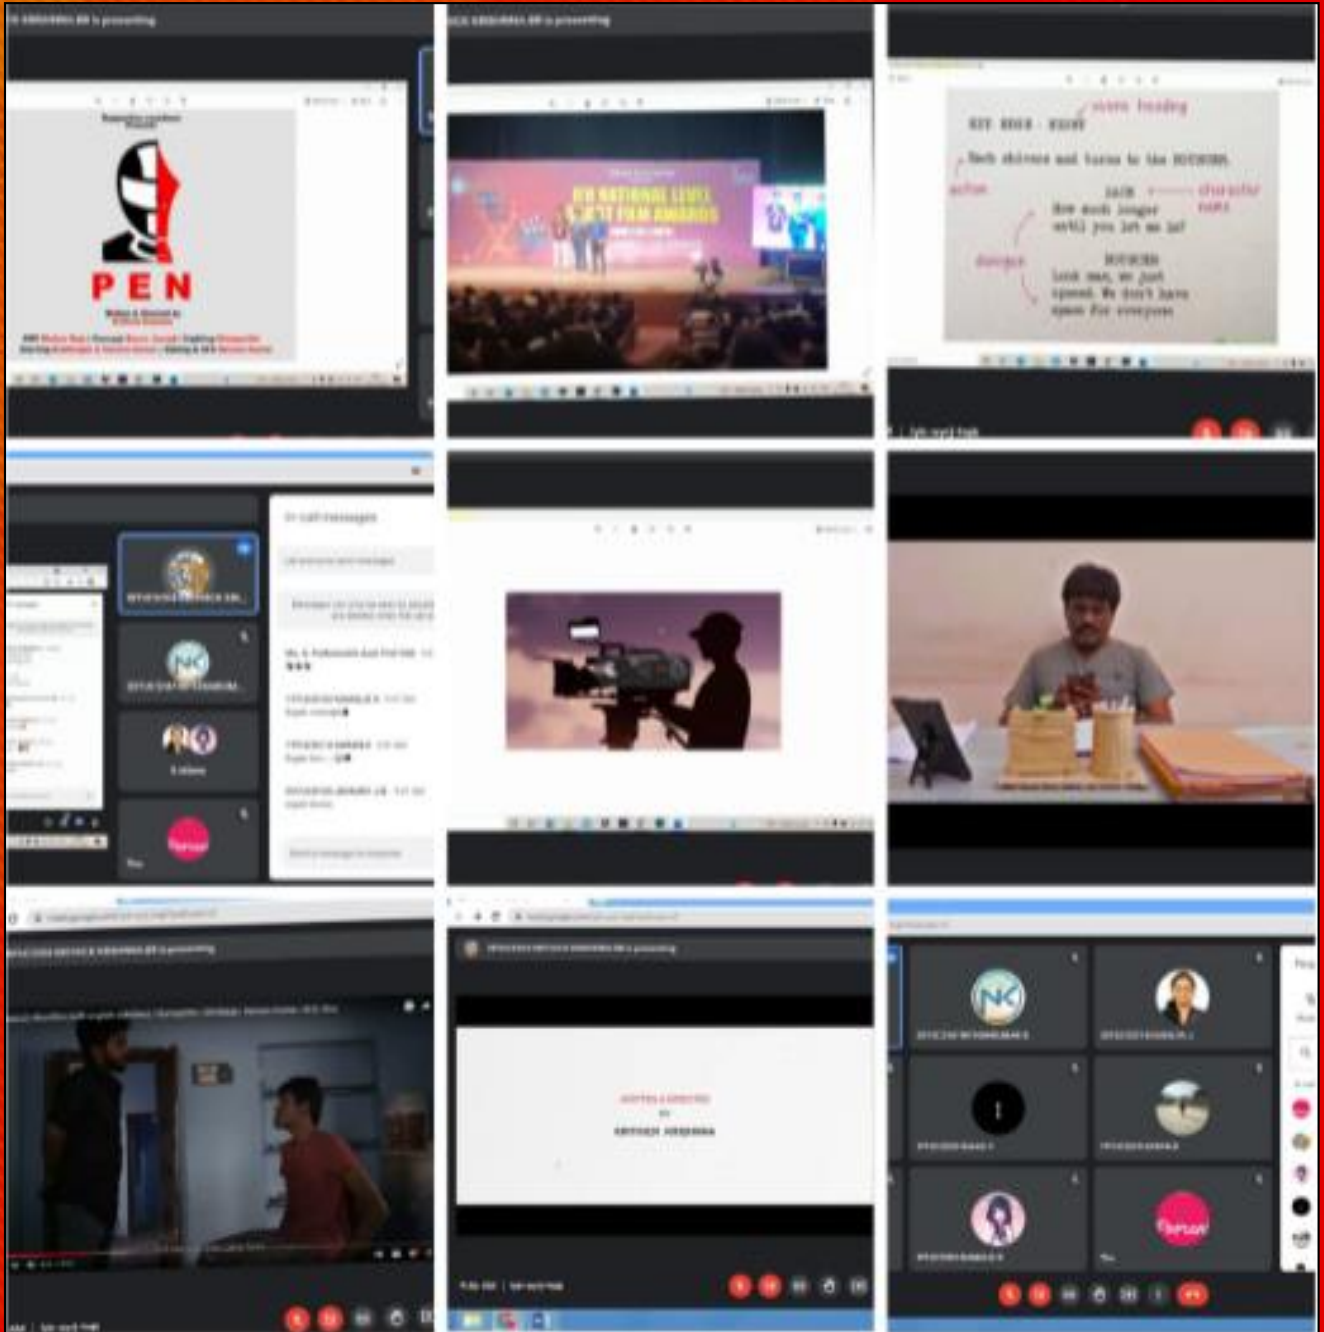

What Is Cross-platform App Development?

Many people mistake that hybrid and cross-platform are the same, but the only similarity between both types of the app is the "code shareability." The cross-platform app approach also allows developers to write code once and reuse for different platforms.

It is the best approach for low-cost custom apps with secure, stable, and easy to maintain and iterate features. Many cross-platform app development frameworks are there that help to achieve the native app-like feel and user experience.
