ABSTRACT

Recent research, in the field of structural durability and longevity has raised the interests in the precipitation of calcium carbonate (CaCO₃) by certain bacterial strains. Use of bacteria as a self-healing material via bio mineralisation is a natural healing process which heals crack by mineral precipitation. The microbiologically induced precipitation accelerates at different rates at different conditions. Therefore, this environmental study was aimed at finding the best curing media, possibility to apply *Bacillus megaterium* integrated into mortar matrix to act as a self-healing agent to seal the crack at a 10⁵ cells/ml concentration by subjecting the mortar cubes to varying temperature conditions. The change in properties of mortar cubes with change in curing media, days of curing and range of *Bacillus* solution added were analysed. The results were compared with the conventional ones cured in different media. X-ray powder diffraction (XRD) and scanning electron microscopy (SEM) confirms the microbiologically induced mineral precipitation. Mortar cubes are cracked and evaluated visually for successive days to find the healing efficiency. The conclusions of the paper suggest promising application of self-healing mortar cubes at different geographical locations by varying the amount of bacterial solution.

1. Introduction

In order to improve the structural durability and longevity it is necessary to maintain the structure free from cracks. Concrete and mortar are the topmost materials of structures which tend to crack under stress. External loads, shrinkage, deformation, alkali-silica reactions or sulfate attacks etc. results in tensile stresses in concrete. Without quick response or apt conduct, pops tend to develop further and ultimately entail a high cost to restoration. Due to the ingress of water and chemicals, in the long time, the sturdiness of concrete will be reduced. This can be paid off by the adoption of an environment friendly technique of crack healing by the soil bacterium – (used as the self-healing material), capable of calcite precipitation. They by the metabolic process are capable of filling the pores generated on the surfaces of structures, henceforth pore size reduces below 1 μm (Jonkers et al., 2010; Jonkers & Schlangen, 2008), thereby it increases the mechanical property (Bang et al., 2001; Ramachandran et al., 2001; Tittelboom et al., 2009). Most of the studies happened with *Bacillus* species since they are mostly soil bacteria harmless to human. The present experimental investigation is a study on the environmental influence of

ECE | DC MEETING | DESIGN OF INTEGER AND FRACTIONAL ORDER MODEL BASED CONTROLLER WITH PARAMETER OPTIMIZATION TECHNIQUE FOR INDUSTRIAL PROCESSES

The image shows a Zoom meeting interface. The top portion displays a presentation slide titled "BANNARI AMMAN INSTITUTE OF TECHNOLOGY SATHYAMANGALAM" with the subtitle "DESIGN OF INTEGER AND FRACTIONAL ORDER MODEL BASED CONTROLLER WITH PARAMETER OPTIMIZATION TECHNIQUE FOR INDUSTRIAL PROCESSES". The slide lists the author as **TRAJESH**, Research Scholar (Reg. No.: 1514369183), Faculty of Electrical Engineering, Anna University, Chennai - 600 025. It also lists two supervisors: **Dr. G.M.TAMILSELVAN**, Supervisor (Ref. No.: 2448395), Professor & Head, Department of Electronics and Communication Engineering, Sri Krishna Institute of Technology, Coimbatore - 641042; and **Dr. T.V.P. SUNDARARAJAN**, Joint Supervisor, Professor, Department of Electronics and Communication Engineering, Sri Sakshya Institute of Engineering and Technology, Coimbatore - 641062.

The bottom portion of the image shows a gallery view of participants in the meeting. The participants visible are: RAJESH T BIT (presenting), Dr. Sundararajan TVP, Ragupathy U.S.usr.eio, Sanjeevi Gandhi, and You (the viewer). The meeting controls at the bottom show a recording icon (REC) and the time 2:13 PM.

Mr T Rajesh, Research Scholar, presented his research on “**Design of Integer and Fractional Order Model based Controller with Parameter Optimization Technique for Industrial Processes**” in the DC Meeting under the guidance of Dr G M Tamil Selvan, Professor and Head, Dept. of ECE on 12 March 2021.

Highly on demand : Justice

Standing at the corner of the street
Looking for generosity,
Waiting for those people to
Accept my curiosity,
Never I taught that I would get caught
Under all the flies of each,
Pollution, global warming, acid rain?
This is more than a disaster,
Never ending with one Easter.
Discrimination, injustice, inequality,
The finally pictured human race's quality,
Me being a girl,
Always being paratized,
Which turned me paralyzed,
Both mentally and physically,
Strong enough to accept the criticism,
Waiting for socialism to being the race,
But all I saw was raging communism.

Dreams of a perfect Nation,
Containing the best constitution,
The government lacking socialization,
Creates a perfect Indian fashion,
That's just when justice comes to play,
Equality is that thing we like to rely.

But everyone want is that food, shelter, water and act of being just.
That can never get hid in the mist,
Gleam of light in the darkest world to create a stronger fist,
Justice will truly create a blast.

Truth will always triumph,
And it always is genuine,
Eventually justice too.

அன்றோ நீதியை காப்பாற்றியவன் நீதிபதியானான்;
இன்றோ நீதியை கொன்றவன் நீதிபதி யாக இருக்கிறான்;
அன்றோ நீதிக்காக போராடியவன் தலைவனாகப் பட்டான்;
இன்றோ நீதிக்காக போராடியவன் தீவிரவாதியாகப் பட்டான்;
அன்றோ குற்றம் செய்தவன் தூக்கிலிடப் பட்டான்;
இன்றோ குற்றமற்றவன் தூக்கிலிடப் படுகிறான்;
இன்று நீதி தேவதையின் கண்கள் கட்டப்பட்டுள்ளன;
அவிழ்த்து விடுங்கள் பார்வையும் அவள்;
