International Day for Biological Diversity (22 May) - 2020
## Theme : Our Solutions are in Nature

The United Nations has proclaimed May 22 as the International Day for Biological Diversity to increase understanding and awareness of biodiversity issues. Biological diversity is often understood in terms of the wide variety of plants, animals and microorganisms, but it also includes genetic differences within each species — for example, between varieties of crops and breeds of livestock — and the variety of ecosystems (lakes, forest, deserts, agricultural landscapes) that host multiple kind of interactions among their members (humans, plants, animals).

As the global community is called to re-examine our relationship to the natural world, one thing is certain: despite all our technological advances we are completely dependent on healthy and vibrant ecosystems for our water, food, medicines, clothes, fuel, shelter and energy, just to name a few. The theme "Our solutions are in nature" emphasizes hope, solidarity and the importance of working together at all levels to build a future of life in harmony with nature.

International Day of UN Peacekeepers - 2020 Theme: Women in Peacekeeping: A Key to Peace

The International Day of United Nations Peacekeepers, 29 May, offers a chance to pay tribute to the uniformed and civilian personnel's invaluable contribution to the work of the Organization and to honour more than 3,900 peacekeepers who have lost their lives serving under the UN flag since 1948.

This year, the challenges and threats faced by our peacekeepers are even greater than ever, as they, like people around the world, are not only having to cope with the COVID-19 pandemic, but also support and protect the people in the countries they are based in. They are continuing their operations to the best of their abilities and supporting the governments and the local populations, despite the risk of COVID-19. The theme for this year's Day is "Women in Peacekeeping: A Key to Peace" to help mark the 20th anniversary of the adoption of UN Security Council Resolution 1325 on Women, Peace and Security.
