The College Day celebrations of SKCT began in a pompous way presided by Shri. K. Aadhithya, Trustee, Sri Krishna Institutions. SKCT heartily congratulate its student and faculty achievers by honoring them with prizes and awards. Shri. K. Aadhithya gave away the presidential address for the day. His message to students was to have a positive outlook, work smart and hard and to live healthily. He advised students to come out of their comfort zone to achieve success in their lives. ### Story of an Accidental Invention

#### Anesthesia

**Inventor:** Horace Wells

**Year:** 1844

**What Happened:** In its salad days, nitrous oxide was strictly a party toy, since it made people howl like hyenas. But a friend of the dentist took too much of the stuff at a laughing-gas stage show and gashed his leg.

**Big Discovery:** The friend hadn't realized he'd hurt himself.

**As a Result:** Nitrous oxide became an early form of anesthesia

Microbial life is now considered so likely on Mars that scientists take special precautions to sterilize spacecraft before sending them over there. That's not the only place, though. With several icy moons scattered around the solar system, it's possible there are *extreme microbes* somewhere in the oceans of Jupiter's Europa, or perhaps underneath the ice at Saturn's Enceladus, among other locations.

“Proper information on what’s happening around us in our Institution is given by this newsletter. An initiative, where every single soul from our institution can be benefitted in many ways. “Success comes from consistently working towards what you want. It’s a long term game and not quite a weekend project.” Our college exposes students towards success as well as a bright future ahead. So finally the time has come where we “students” get a small chance to actually contribute our knowledge in this newsletter by writing what we eventually want or do in our college. So let’s give it a shot!”
