EDITOR - IN - CHIEF
Dr A BALAMURUGAN
PROFESSOR & HEAD, CSE

CO-EDITORS
Dr P Manju, ICE,
Dr T Rajesh Kumar, IT
Mr N Karthikeyan, SoM
Ms R Kalpanasonika, CSE

KNOWLEDGE UPDATE

CSE department -Ms. R.kalpanasonika and Ms.Nivedha are attending 2 days workshop on MATLAB and LaTeX at Amrita university

Mechanical department – Outcome Based Education presentation to all faculty members by Dr. T. Pridhar at CAD lab on 03.05.19

Mechanical department- Dr.S.Sundararaj , Prof/ Mech has attended ISHRAE CWC meeting on 2.5.19 at ISHRAE Coimbatore Chapter

EEE department- OBE presentation was done by Ms. R. Divya Lakshmanan, AP/EEE in the department

MEETINGS & DISCUSSIONS

CSE department – Internal Academic Audit was conducted at the department by audit committee members.

EEE department – Internal audit file verification by Internal Audit team with HOD.

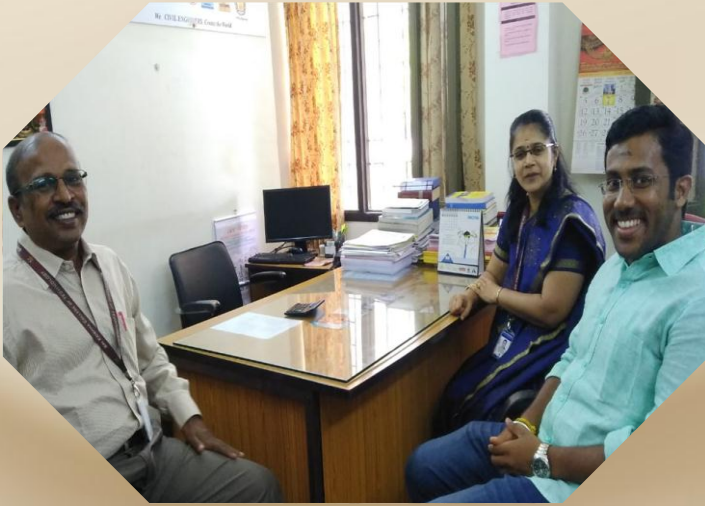

Mechanical department –HoD convened a Department meeting with all faculty members at Metrology lab on 02.05.19

IT department – A Meeting was convened to discuss about Internal Audit file preparation, Attainment preparation

ALUMNI CORNER

Civil - Mr. Vignesh Kumar, 2009-13
Batch, Civil Engineering Department,
made a visit to our college and had an
interaction with our faculty members
in the Department.

Civil - Our Alumnus, Kayalvizhi.S.K (1999-2003
batch) own a firm Geo explore and Global
Structures (Specialist in geotechnical area) .

She is a CMDA registered Geotechnical
engineer. Contact for any work in soil
investigation and rehabilitation

S K KAYALVIZHI M.E.,(Ph.D)
Geotechnical Consultant
CMDA Reg.No: GTE/19/03/014

PLACEMENTS

Civil - Mr.U.Gowtham and Mr. A.Theepak, IV Year Civil (2015-19 Batch) have got selected as Trainee Engineer at M/s. Arth Agam Architects, Coimbatore.

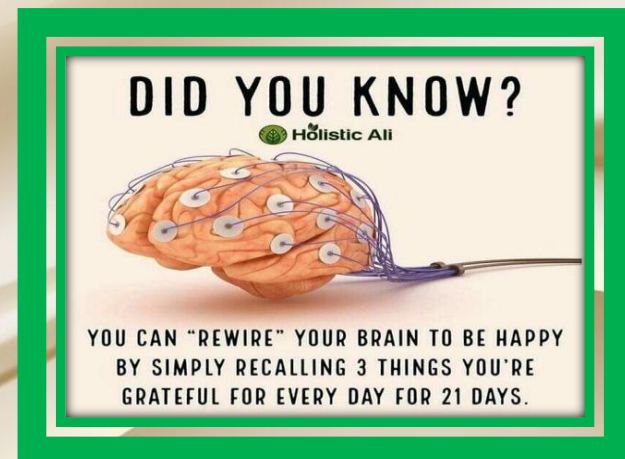

RECENT TRENDS

'Beam of Invisibility' Could Hide Objects Using Light

Once thought of as the province of only "Star Trek" or "Harry Potter," cloaking technologies could become a reality with a specially designed material that can mask itself from other forms of light when it is hit with a "beam of invisibility". The new study's researchers from the Technical University of Vienna, have developed a different strategy to render an object invisible using a beam of invisibility. The concept involves shining a beam, such as a laser, onto a material from above to pump it full of energy. This can alter the material's properties, making it transparent to other wavelengths of light coming in from the side. To achieve this, a beam with exactly the right pattern has to be projected onto the material from above. The pattern that is projected onto an object to render it invisible must correspond perfectly to the inner irregularities of that item that usually scatters light.

BOOK REVIEW

[Armageddon of a Different Order: Wake Up, America](#)

by Dennis Dawson Elliott
iUniverse

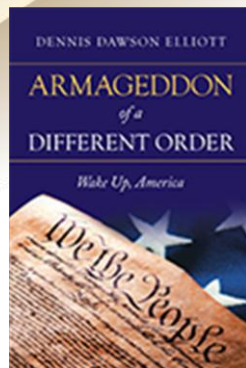

book review by Michael Radon

"The world is losing respect for the United States because the president has demonstrated he cannot be trusted."

In a series of essays focused on both the breadth and a particular component of the Donald Trump presidency, the author of this book seeks to illuminate and call for accountability toward the myriad inconsistencies between promises and deliverables. From the Russia investigation to the concealed tax documents, the Supreme Court appointees and the constant turnover of staff, every remarkable fact or curiosity of Trump's White House is examined and scrutinized by the author.

Challenging the reader to resist rather than persist, these essays are a call to action for a country that has enjoyed prosperity for centuries but must also endure greater scrutiny on the global scale, especially in a digital age. Despite being a warning to the readers and to the country about the dangers of Trump's behavior both domestically and abroad, the author does manage to have a little creative fun while making his case known. At the end of the book, a short glossary is featured that contains many words relevant to the executive branch, their definition, and then an alternate definition in step with or tied to Trump's actions in office.

The author's background in journalism and media ethics no doubt causes the "fake news" discussion to be a particular sticking point but also gives the text increased weight considering the responsibility and necessity of a free press to fairly observe and report on the government. Readers who are either concerned for the state of affairs in this country and want to learn more about what makes this government abnormal, or those who wish to understand better why so many people are appalled or upset, will find this book very enlightening.
