BOOK REVIEW

EDITOR - IN - CHIEF
Dr.Srinivasan Alavandar
PRINCIPAL

CO-EDITORS
Dr P Manju, ICE,
Dr T Rajesh Kumar, IT
Mr N Karthikeyan, SoM
Ms R Kalpanasonika, CSE

KNOWLEDGE UPDATE

EEE Department - Mr.K.P.Suresh AP/EEE, has shared his knowledge to all Faculty members in "Advanced Topics in Power system Protection",after a QIP he attended in IISc., Bangaluru

Civil Department – Newly joined Faculty members have discussed about various tools and techniques available in Smart Board.

MEETINGS & DISCUSSIONS

S&H Department- A meeting is convened with M3 Course committee in charges

IT Department- HoD /IT convened a meeting to discuss about the Action Plan for Funded Projects proposals with SIG Cluster Heads
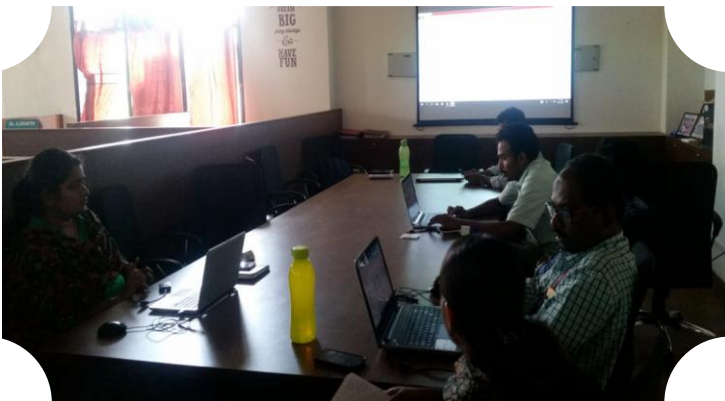

CSE Department- A meeting was conducted to revise the course plan format in the department.

Mech Department- Mr.R.Rathish AP/Mech, Mr. S.Thiyagu,AP/Mech have conducted 1st Course committee meeting for the subject "Entrepreneurship development".

ICE Department- a meeting was convened to finalize the Department Academic Calendar

EEE Department- HoD/EEE conducted a meeting with an agenda of explaining AICTE Examination Reforms to the faculty.

ACCOMPLISHMENTS

CSE Department - A.Ajay BAjaji-Final year A, has participated in Intellectual Property Talent Search Examination
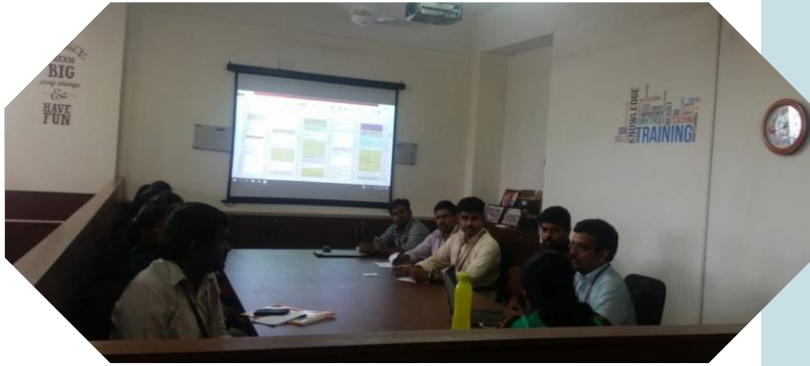

ALUMNI CORNER

Mech Department- Mr.R.Richard, Technical Engineer, Sri Ragavendra Auto care, Coimbatore. 2014- Batch alumnus interacted with final year students pertaining to core Placement

Civil Department - Mr. R.Kavin of 2013-17 Batch (B.E.Civil) had an interaction with our faculty on his experience with Accenture.

PLACEMENTS

P & T Division - A meeting was convened to discuss about the placement progress and placement academic calendar across all departments..

Civil Department -Mock interview for Final year Civil Engineering Students has been conducted by the Department Faculty members.

Bimoz – World's lightest and smartest e-bike drive

With the growing stress on the environment, more and more people are turning away from motorcade and towards bikes. And with this, we've seen an increase in the number of smart bikes or e-bikes which come with assistive drivetrain to help you keep going without getting exhausted. But if you don't want to give up on your old bike, you can convert it into an e-bike with Bimoz. It comes with a 250W battery pack which adds less than 2kg to your bike's weight and the easy installation process allows you to replace any bike pedal with Bimoz. With the compatible app, you can note your GPS location, track routes, connect with friends, and even simulate mountains on flat roads to train your legs. So, whether it's for exercise or for getting more power out of your bike, Bimoz is the ultimate solution for converting any bike into an e-bike.

When We Should Start Coding?

Hi Everyone

Are you on Facebook, Whatsapp, Instagram? Do you buy products from Amazon, Flipkart, Ebay? Do you eat with Swiggy, Zomato? These are all awesome Software Products. Do you want to create these awesome websites or apps then you should start learning how to code to become a Great Software Developer.

"Programming is like any other sport. You might know the rules but you have to play to learn"

Coding or Programming does need any age to start. We can start programming based on our interest. Even there are many software like scratch that teaches even small children from the age of 5 the programming concepts using animations. A Child can even develop an App with the MIT app inventor a great tool which uses the same interface as the scratch. According to the survey it has been seen that the best programmers in the market have started coding from 8 to 10 years. A great programmer is Linux Torvalds who started playing with computers at the age of 10. Another example would be Tanmay Bakshi a youngest IBM Watson developer who started to code at the age of 5. He had his own app published in the Apple play store that teaches multiplication at the age of 10. The best age to get into a coding boot camp is between the age of 18 and 25. If you have an interest in programming then you can start learning it at any age. A person went into the tech industry at the age of 40. But there are some prerequisites before learning to code, they are core principles of computer science. You should have the patience to program.

As soon as you start learning to code you need to set goals every week or after learning particular concepts as it will help you to remember all concepts and build a strong foundation. For example, you are learning PHP then try to build a dynamic website or you are learning Java try to build some basic Android app. Once you are strong with all programming concepts you are ready to jump into data structures and algorithms and become a Software developer or Programmer.

Programming is not only about logic it also deals with User Interactions and databases and cryptography. So based on your interest choose your programming language and land in your dream job by doing your favorite work and enjoy your career.'

So to start your career in programming here is your awesome friend Codepark who will help you to learn programming step by step in an easy and interesting way for free.

" a **friend** in need is a **friend** indeed"
here your friend is Codepark

FLOOD OF FIRE

Amitav Ghosh

It is 1839 and tension has been rapidly mounting between China and British India following the crackdown on opium smuggling by Beijing. With no resolution in sight, the colonial government declares war.

One of the vessels requisitioned for the attack, the Hind, travels eastwards from Bengal to China, sailing into the midst of the First Opium War. The turbulent voyage brings together a diverse group of travellers, each with their own agenda to pursue. Among them is Kesri Singh, a havildar in the East India Company who leads a company of Indian sepoys; Zachary Reid, an impoverished young sailor searching for his lost love, and Shireen Modi, a determined widow en route to China to reclaim her opium-trader husband's wealth and reputation. Flood of Fire follows a varied cast of characters from India to China, through the outbreak of the First Opium War and China's devastating defeat, to Britain's seizure of Hong Kong.

Flood of Fire is a thrillingly realised and richly populated novel, imbued with a wealth of historical detail, suffused with the magic of place and plotted with verve. It is a beautiful novel in its own right, and a compelling conclusion to an epic and sweeping story.
