INTERESTING ENGINEERING

Bike locks, even the burliest ones, all have the same Achilles' heel: If given enough time, any determined thief can wrest a bicycle free. Lock8 reimagines bicycle security by using hardware and software to detect and respond to a potential theft. A gyroscope, an accelerometer, and a temperature sensor can pick up on a variety of assaults, including bolt cutters, chainsaws, blowtorches, and ice sprays. And the system will respond to any threat by blaring an alarm and sending alerts to a phone.

The brainchild of an ER doctor and an economist, Lock8 weighs less than a pound and connects to a bicycle's rear hub. The accompanying app provides keyless entry, and by sharing the e-key, anyone can loan or rent his or her bicycle. European bike-share programs are the first to use Lock8; it's being released this month. The company also plans to develop models for consumers.

HEALTH TIPS

Drinking Tea Right After Meals - Is It Good Or Bad?

Benefits and Disadvantages of Drinking Tea After Eating

- Some research suggests that the phenolic compound found in tea hinders the absorption of iron by making iron complex in the inner layers of our abdominal intestines.
- It is said that if you want to drink tea while eating, include iron and vitamin C rich ingredients in your diet, which will reduce the effect of iron absorption.
- People suffering from iron deficiency should not take tea along with food. It has also been found that drinking tea during eating leads to catching deficiency in the body.
- Catkin is a compound found in tea which has an important role to play in many of our psychological activities.
- So if you want to drink tea with or after meals, you can choose from green tea or ginger tea as these are helpful in your digestion.
- People who are suffering from iron deficiency should not take tea during meals or seek medical advice.
- Most people in India are fond of drinking tea after eating food. If you do that, you need to be careful.

BOOK REVIEW

Beartown

Fredrik Backman

The #1 *New York Times* bestselling author of *A Man Called Ove* returns with a dazzling, profound novel about a small town with a big dream—and the price required to make it come true.

People say Beartown is finished. A tiny community nestled deep in the forest, it is slowly losing ground to the ever encroaching trees. But down by the lake stands an old ice rink, built generations ago by the working men who founded this town. And in that ice rink is the reason people in Beartown believe tomorrow will be better than today. Their junior ice hockey team is about to compete in the national semi-finals, and they actually have a shot at winning. All the hopes and dreams of this place now rest on the shoulders of a handful of teenage boys.

Being responsible for the hopes of an entire town is a heavy burden, and the semi-final match is the catalyst for a violent act that will leave a young girl traumatized and a town in turmoil. Accusations are made and, like ripples on a pond, they travel through all of Beartown, leaving no resident unaffected.

Beartown explores the hopes that bring a small community together, the secrets that tear it apart, and the courage it takes for an individual to go against the grain. In this story of a small forest town, Fredrik Backman has found the entire world.
