Congrats to the Team !!!

OUTREACH

III BE ICE students visited **Aavin Milk Industry, Parur**, Coimbatore and got exposed to the control and instrumentation involved in food processing industry

INTERESTING ENGINEERING

The Texas-based start-up ICON caught the attention of the world when it created a fully functioning **350-sq.-ft.** home in **48 hours** with the assistance of their Vulcan 3D printer.

Their invention has the ability to help with the construction of a home, laying the frame and foundation of the home before labor is needed.

The ICON team hopes to use their invention to help combat homelessness.

**DID YOU
KNOW???**

HOW DOES A CHAMELEON CHANGE ITS COLOR?

Chameleons change their color by manipulating specialized cells called chromatophores that contain different colors of pigment. When a chameleon wants to convey a particular mood, its brain sends a message to its chromatophores, which then move pigments around to change the chameleon's color.

WHAT HAPPENED TODAY

1968 : The investigative television news magazine program "60 Minutes" was shown for the first time on CBS.

1980 : Iraqi planes bombed Iran's Kharg Island crude oil export terminal

2013 : China announced that they are banning the export of some materials and technologies to North Korea that could potentially aid in the development of nuclear weapons.
