INTERESTING ENGINEERING

The Mirror is one of the sleekest looking inventions on this list. Perfect for those with fitness goals in 2019, the interactive mirror helps take your home fitness regime to the next level. The device streams live workouts and even offers an interactive fitness coach.

WHAT HAPPENED TODAY

1956 : Egypt has celebrated it's first day running the Suez Canal by Egyptian Technicians.

1978 : Egyptian President Anwar el-Sadat and Israeli Prime Minister Menachem Begin sign the Camp David Accords.

2001 : After 6 days following the 9-11 terrorist bombing in New York City, Wall Street opens for business and resumes trading, ending the longest shut down since the great depression

2013 : The Rwandan Patriotic Front Party of Rwanda wins with an overwhelming majority in the country's recent parliamentary elections.

AWARENESS CORNER

SAVE WATER NOW.

IT'S EASY TO SAVE WATER:

Cut your shower time by two minutes

Turn off the tap when brushing your teeth

Run your washing machine and dishwasher when they're full and on 'eco' and 'fast' settings

Use the half-flush on toilets where possible

Skipping breakfast can cause brain damage, Know what researchers say

Many people do not eat breakfast, which can harm health. If you do not know, then let us tell you that not having breakfast can affect your brain. Brain damage is an injury that causes the destruction of brain cells. When your brain, which is the control centre of your body, gets damaged, your thoughts, memory, sensation and even personality can be severely affected. Know what the experts says about it.

Salt intake

According to a study published in the Journal of Jama Neurology, excessive intake of salt may increase the risk of high blood pressure, resulting in a decrease in memory and an increased risk of brain stroke. A high risk of stroke can cause serious damage to your brain.

Not having breakfast

Research suggests that skipping breakfast prevents your brain from getting enough nutrients, can negatively impact cognitive function. It prevents the brain from regulating, it increases the chances of brain damage.

Use of Mobile Phone

Researchers have linked high mobile phone use to sleep disturbances and depressive symptoms in men. In a study conducted by the All India Institute of Medical Sciences (AIIMS), prolonged exposure to mobile phone radiation may increase the risk of brain tumours.

Lack of sleep

A study conducted by WHO found that lack of sleep can cause brain damage and result in early memory loss or Alzheimer's disease. This is because sleep allows the brain to clear toxins that can form during waking hours.

25,000,000 of your cells died while you were reading this sentence.

BOOK REVIEW

The Sea, The Sea

Iris Murdoch

Charles Arrowby, leading light of England's theatrical set, retires from glittering London to an isolated home by the sea. He plans to write a memoir about his great love affair with Clement Makin, his mentor both professionally and personally, and to amuse himself with Lizzie, an actress he has strung along for many years. None of his plans work out, and his memoir evolves into a riveting chronicle of the strange events and unexpected visitors--some real, some spectral--that disrupt his world and shake his oversized ego to its very core.

In exposing the jumble of motivations that drive Arrowby and the other characters, Iris Murdoch lays bare "the truth of untruth"--the human vanity, jealousy, and lack of compassion behind the disguises they present to the world. Played out against a vividly rendered landscape and filled with allusions to myth and magic, Charles's confrontation with the tidal rips of love and forgiveness is one of Murdoch's most moving and powerful novels.

MOTIVATIONAL ZONE

The key responsibility of leadership
is to think about the future. No one
else can do it for you.
